

## WPZ Poland straw blending line

At WPZ in Poland recently four machines were delivered. Assembled these make up a straw blending line which is fed with bales and also chicken litter and gully water is added and mixed. A new feature is a device to make sure the rigid core of the round bales is loosened sufficiently.

On our website [www.hoving-holland.nl](http://www.hoving-holland.nl) you can find information about our company and the custom made equipment from our delivery program. Also former Newsflashes can be found here.

If you have any enquiries, please contact us. We will gladly answer your questions.
